# Roshan Shrestha

## Engineering Manager | Software Architect

Lalitpur, Nepal +977 9841445566 https://www.linkedin.com/in/roshanshrestha-nep
https://github.com/roshan-dev-np

### PROFESSIONAL PROFILE

Strategic Engineering Manager with over 11 years of experience in the Nepal IT sector, specializing in building high-performance engineering cultures and scalable cloud architectures. Successfully transitioned from a Senior Individual Contributor role into leadership, with a proven track record of managing cross-functional teams at Leapfrog and Cotiviti. Expert in Agile methodologies, delivery management, and mentoring technical talent to achieve organizational goals.

### CORE COMPETENCIES

Leadership: Engineering Management, Agile/Scrum, Mentorship, Delivery Management, Stakeholder Management

Technical: Java, Spring Boot, Microservices, Node.js, React, Oracle DB, PostgreSQL

Infrastructure: AWS (EC2, S3, RDS), Docker, Kubernetes, CI/CD Pipelines, JIRA

### PROFESSIONAL EXPERIENCE

**Engineering Manager** Jan 2021 - Present
Leapfrog Technology

- Oversee delivery for three cross-functional engineering teams (20+ engineers) focused on US-based healthcare and fintech products.
- Transitioned from a Lead Engineer role to full-time Management, focusing on sprint planning, resource allocation, and stakeholder management.
- Implemented a structured mentorship program that reduced onboarding time for junior developers by 30%.
- Drive technical strategy and architectural reviews for microservices-based platforms hosted on AWS.
- Collaborate with Product Managers to define roadmaps and ensure timely delivery of high-impact features.

**Senior Software Engineer / Team Lead** May 2017 - Dec 2020
Cotiviti Nepal

- Led a team of 6 developers in the Healthcare Informatics division, balancing hands-on coding with team leadership responsibilities.
- Architected and developed complex data processing pipelines using Java and Spring Boot for large-scale medical claim analysis.
- Facilitated daily stand-ups and sprint retrospectives, improving team velocity by 15% through process optimization.
- Acted as the primary technical point of contact for US-based stakeholders during the transition of legacy systems to modern cloud infrastructure.

**Software Engineer** Jun 2014 - Apr 2017
Deerwalk Inc.

- Developed and maintained enterprise-level web applications using Java, Hibernate, and Oracle DB.

- Optimized SQL queries and database schemas, resulting in a 40% reduction in reporting latency.
- Collaborated with the QA team to implement automated unit testing, increasing code coverage to 85%.

**Junior Software Engineer** Aug 2012 - May 2014

F1Soft International

- Contributed to the development of mobile banking modules for major commercial banks in Nepal.
- Assisted in the integration of third-party APIs for utility payment services.
- Participated in the full software development life cycle from requirement gathering to deployment.

## EDUCATION

**Pulchowk Campus, Institute of Engineering** Nov 2008 - Jul 2012

Bachelor of Engineering in Computer Engineering
