TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, HTML/CSS

Backend: Spring Boot, Node.js, Express.js, Hibernate

Databases: PostgreSQL, MongoDB, Redis

Tools: Docker, Git, Postman, Jenkins, JUnit

EDUCATION

Islington College (London Metropolitan University)
BSc (Hons) Computing in Information Technology
Nov 2019 - Jun 2023

Little Angels' College
Higher Secondary (+2) in Science
Jul 2017 - May 2019

PROFESSIONAL PROFILE

Detail-oriented Junior Backend Developer and recent BSc (Hons) Computing graduate from Islington College. Proven ability to develop robust server-side logic and manage databases through a comprehensive internship at F1Soft International and a complex academic capstone project. Skilled in Java, Spring Boot, and Node.js with a strong foundation in microservices and RESTful API design.

WORK EXPERIENCE

Backend Development Intern
F1Soft International
Jun 2023 - Aug 2023

- Assisted the core banking integration team in developing RESTful APIs using Java and Spring Boot for mobile banking modules.
- Collaborated with senior developers to optimize SQL queries, reducing database response time by 15% for transaction history lookups.
- Wrote unit tests using JUnit and Mockito to ensure 85% code coverage for new microservices.
- Participated in daily stand-ups and Agile sprints, contributing to the deployment of three feature updates.

ACADEMIC PROJECTS

Lead Backend Developer - E-Commerce Microservices
Islington College Capstone Project
Sep 2022 - May 2023

- Architected and implemented a scalable backend for a multi-vendor e-commerce platform using Node.js and Express.
- Integrated Khalti Payment Gateway API for secure, real-time transaction processing within the Nepal market context.
- Designed a normalized PostgreSQL schema and utilized Redis for session management and caching.
- Containerized the entire application suite using Docker to ensure environment consistency during development and testing.
