Siddhartha Rajbhandari

Senior FinTech Engineer | Payment Systems & Security

Lalitpur, Nepal +977-9841000000 https://linkedin.com/in/siddharth-rajbhandari-np

PROFESSIONAL SUMMARY

Accomplished Software Engineer with over 8 years of experience in the Nepalese FinTech landscape. Specializing in high-concurrency payment processing, regulatory compliance standards, and secure banking infrastructure. Proven track record of architecting scalable financial systems integrated with Nepal Rastra Bank guidelines.

CORE TECHNICAL COMPETENCIES

Backend Development: Java, Spring Boot, Microservices

Data & Infrastructure: PostgreSQL, Redis, Kafka, AWS, Docker, Kubernetes

Domain Expertise: FinTech Compliance, PCI-DSS, NRB Regulatory Standards, API Security

PROFESSIONAL EXPERIENCE

Senior Backend Engineer Mar 2019 - Present

F1Soft International

- Lead architect for core payment gateway updates to ensure compliance with NRB's recent PCI-DSS and operational risk management frameworks.
- Optimized high-transaction database throughput, reducing latency in eSewa transaction processing by 30%.
- Managed microservices migration for internal settlement systems to improve fault tolerance.
- Collaborated with security audits for annual regulatory reviews.

Systems Developer May 2016 - Feb 2019

Nabil Bank

- Developed core banking API integrations for mobile banking platforms.
- Implemented automated reconciliation scripts for daily ledger balancing, reducing human error by 40%.
- Maintained strict compliance with banking data privacy regulations while managing client-facing middleware.

Junior Software Engineer Jun 2014 - Apr 2016

Leapfrog Technology

- Contributed to the development of custom software solutions for enterprise clients.
- Participated in agile ceremonies and code reviews under senior engineering supervision.

ACADEMIC BACKGROUND

Pulchowk Campus Sep 2010 - May 2014

Bachelor of Engineering in Computer Engineering
