PROFESSIONAL SUMMARY

Result-oriented DevOps Engineer with 6 years of experience in automating, scaling, and monitoring cloud infrastructure. Proven track record in implementing Infrastructure as Code (IaC) and robust CI/CD pipelines for high-traffic applications. Strong expertise in Kubernetes orchestration and security-first infrastructure design. Certified Kubernetes Administrator (CKA) and AWS Solutions Architect with a deep focus on optimizing operational efficiency and system reliability.

TECHNICAL EXPERTISE

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure

Containerization & Orchestration: Kubernetes (CKA), Docker, Helm

Infrastructure as Code: Terraform, Ansible, CloudFormation

Monitoring & Observability: Prometheus, Grafana, ELK Stack, Nagios

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Programming/Scripting: Python, Bash, Go

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer Jan 2021 - Present
Logpoint Nepal

- Architected and managed production-grade Kubernetes clusters on AWS EKS, improving deployment frequency by 40%.
- Automated infrastructure provisioning using Terraform and Ansible, reducing manual environment setup time from days to minutes.
- Designed and implemented a centralized logging and monitoring solution using ELK stack and Prometheus/Grafana for a global SIEM platform.
- Lead the migration of legacy monolithic services to a microservices architecture using Docker and Helm.
- Mentored junior engineers on cloud-native best practices and security hardening of Linux servers.

DevOps Engineer Jul 2018 - Dec 2020
Leapfrog Technology

- Developed and maintained CI/CD pipelines using Jenkins and GitLab CI for multiple client projects across North America and Nepal.
- Optimized cloud costs by 25% through the implementation of AWS Auto Scaling groups and Reserved Instances.
- Managed RDS databases and implemented automated backup and recovery strategies.
- Collaborated with development teams to containerize applications and ensure environment parity across Dev, Staging, and Production.

Associate Infrastructure Engineer Oct 2017 - Jun 2018
CloudFactory Nepal

- Provided 24/7 infrastructure support for a global workforce platform, ensuring 99.9% uptime.

- Automated routine server maintenance tasks using Bash and Python scripting.
- Assisted in the configuration and management of Nginx load balancers and VPC peering.
- Monitored system health and responded to incidents using PagerDuty and Nagios.

EDUCATION & CERTIFICATIONS

Pulchowk Campus, Tribhuvan University Nov 2013 - Oct 2017
Bachelor of Engineering in Computer Engineering
