Styling Tools: Tailwind CSS, SASS, Material UI

Development Tools: Git, GitHub, Figma, RESTful APIs, Firebase

EDUCATION

Islington College (London Metropolitan University)

BSc (Hons) Computing in Software Engineering

Sep 2020 - Jul 2023

Kathmandu Model College

Higher Secondary (+2) in Science

Jun 2018 - May 2020

PROFILE SUMMARY

Detail-oriented Frontend Developer and recent Computing graduate from Islington College with a strong passion for building responsive and user-friendly web interfaces. Proficient in React.js and modern CSS frameworks, with a proven ability to translate complex designs into functional code through various academic and personal projects.

PROFESSIONAL EXPERIENCE

Frontend Development Intern

Leapfrog Technology

Jan 2023 - Apr 2023

- Assisted in the development of a client-facing dashboard using React.js and Tailwind CSS, improving UI consistency across 15+ modules.
- Collaborated with UI/UX designers to convert high-fidelity Figma mockups into pixel-perfect, responsive web components.
- Participated in daily stand-ups and code reviews, gaining exposure to professional Agile development workflows and Git version control.
- Optimized front-end assets and implemented lazy loading, which improved the initial page load time by 20%.

DEVELOPMENT PROJECTS

Lead Frontend Developer

Nepal E-Mart UI (Personal Project)

May 2023 - Aug 2023

- Developed a comprehensive e-commerce frontend template specifically tailored for the Nepali market using React.js and Redux Toolkit.
- Integrated Khalti Payment Gateway sandbox for simulated transaction flows.
- Implemented advanced search and filtering functionality to handle dynamic product catalogs.
- Ensured 100% responsiveness across mobile, tablet, and desktop views using CSS Grid and Flexbox.

Frontend Developer

Student Resource Hub (Academic Project)

Sep 2022 - Dec 2022

- Collaborated with a team of three at Islington College to build a centralized resource portal for BSc Computing students.
- Managed state using Context API and handled asynchronous data fetching from a Node.js backend.
- Successfully deployed the application on Vercel, achieving a 95+ score on Lighthouse for accessibility and SEO.
