Siddhartha Shakya

Senior Data Engineer

Kathmandu, Nepal +977-9841234567 https://linkedin.com/in/siddhartha-shakya-np
https://github.com/sshakya-data

PROFESSIONAL PROFILE

Data engineering specialist with over 8 years of experience in architecting scalable data pipelines, optimizing warehouse performance, and implementing robust ETL processes. Proven track record of managing large-scale data infrastructures for financial and technology sectors in Nepal.

TECHNICAL COMPETENCIES

Languages: Python, SQL

Data Platforms: AWS Redshift, PostgreSQL, Apache Spark

Orchestration & DevOps: Apache Airflow, Docker, Kubernetes, Git

Data Architecture: Warehousing, ETL/ELT, Data Modeling

PROFESSIONAL EXPERIENCE

Senior Data Engineer

Mar 2020 - Present

Nabil Bank

- Lead the modernization of the bank's enterprise data warehouse using AWS Redshift and Apache Airflow.
- Designed and automated ETL pipelines reducing data latency by 60% for financial reporting.
- Collaborate with cross-functional teams to integrate core banking system data for advanced predictive analytics.

Data Engineer

Jun 2017 - Feb 2020

Deerwalk

- Developed high-throughput data ingestion services handling healthcare datasets from various US-based clients.
- Maintained and optimized legacy SQL Server database clusters.
- Mentored junior engineers on best practices for data modeling and query optimization.

Junior Data Engineer

Aug 2015 - May 2017

Leapfrog Technology

- Assisted in the migration of on-premise databases to cloud-based environments.
- Created dashboard datasets using Python and SQL to support internal decision-making processes.
- Participated in agile ceremonies and sprint planning for data-intensive client projects.

ACADEMIC BACKGROUND

Pulchowk Campus

Sep 2011 - Jul 2015

Bachelor of Engineering in Computer Engineering
