Siddhartha Shakya

Cloud Architect | AWS Certified Solutions Architect

Lalitpur, Nepal +977-9841000000 linkedin.com/in/siddhartha-shakya-cloud

PROFESSIONAL SUMMARY

Results-oriented Cloud Architect with over 6 years of experience in designing and implementing scalable, secure, and cost-effective cloud solutions. Specialized in migrating on-premise infrastructure to AWS, optimizing microservices deployments, and managing high-availability environments for enterprise-level applications in the Nepali tech sector.

TECHNICAL EXPERTISE

Cloud Infrastructure: AWS (EC2, EKS, Lambda, RDS, S3, DynamoDB, CloudFormation)

DevOps & Automation: Terraform, Jenkins, Ansible, CI/CD, Bash Scripting

Containerization & Monitoring: Docker, Kubernetes, Prometheus, Grafana

Languages & Tools: Python, Linux, Git

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer Mar 2020 - Present

CloudFactory Nepal

- Lead architect for migrating legacy monolithic applications to containerized microservices using AWS EKS.
- Reduced cloud infrastructure costs by 30% through comprehensive resource tagging, rightsizing, and implementation of AWS Savings Plans.
- Designed and maintained CI/CD pipelines using Jenkins and Terraform, reducing deployment time by 45%.
- Mentored a team of 4 junior engineers on best practices for AWS security and compliance.

Cloud Infrastructure Associate Jun 2017 - Feb 2020

Cotiviti Nepal

- Managed multi-region AWS environments, ensuring 99.99% uptime for healthcare data processing platforms.
- Implemented automated backup and disaster recovery solutions using AWS Lambda and S3 Lifecycle policies.
- Collaborated with development teams to troubleshoot performance bottlenecks in production databases.
- Automated server provisioning tasks using Ansible and AWS CloudFormation.

ACADEMIC BACKGROUND

Pulchowk Campus Sep 2012 - Aug 2016

Bachelor of Engineering in Computer Engineering
